

Product Specification

Light Planet LED Ceiling Panel Light

The Light Planet LED ceiling panel light is designed to replace fluorescent tube light installations in offices and open spaces. Suitable for integration in standard suspended grid ceilings, the unit is both efficient and effective.

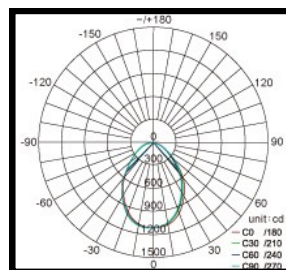

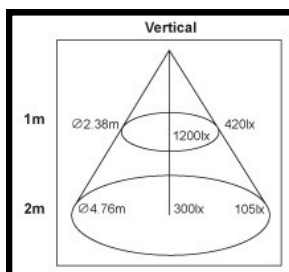

The solid state LED lighting system is durable and maintenance free, eliminating the need for costly bulb changes. A typical installation will last for the life of an office décor between refits.

Energy savings of 50% or more are possible when comparing this panel with a typical fluorescent equivalent, with the additional benefits of lower operating costs and carbon reduction.

Basic Specification					
Category	Power Consumption	Current	Beam Angle	Illuminance	Finish
Grid Lights	45W	110—240V AC	100°	1200Lx @ 1m	Silver

Options			
Part Reference	Colour Temperature	Output Lm	Dimensions
18005	5600K	2800	605mm x 605mm x 82.3mm
18010	3000K	2400	605mm x 605mm x 82.3mm
18015	5600K	2800	595mm x 595mm x 82.3mm
18020	5600K	2400	595mm x 595mm x 82.3mm

Driver Requirements			
Type	Input	Output	Status
Constant Current	100—240V 50/60Hz	36-48V 1A	INCLUDED
